WORK EXPERIENCE

Lead Web Developer

Integra LifeSciences

📅 2022 - current 📍 Research Triangle Park, NC

- Led the development of a client portal application using React, onboarding 240+ new users within three months
- Worked with six developers to manage codebase versioning using Git, slashing merge conflicts by 56%
- Integrated MongoDB database with Node.js back-end services to **support data synchronization for 10,086 users**
- Optimized front-end performance and boosted cache hit rate by 38% by harnessing Webpack for module bundling

UI Developer

Pendo

📅 2018 - 2022 📍 Raleigh, NC

- Built responsive user interfaces with React and Bootstrap, improving compatibility across 6 major browsers
- Maintained modular Angular components for scalable web applications, handling over 50,064 requests per day
- Used Sass for faster styling, trimming CSS file sizes by 17%
- Configured applications on Nginx servers, **ensuring 99.8% uptime** for 209 customer-facing instances

Technical Support Representative

IBM

📅 2017 - 2018 📍 Raleigh, NC

- **Managed a portfolio of 54 corporate clients**, consistently meeting service level agreements for issue response times
- Aided in MongoDB database troubleshooting, enhancing efficiency and slashing customer downtime by 3 hours
- Guided customers through over 56 Git-based version control issues per week
- Collaborated with four engineers on Nginx configurations
